Tampa, FL | 863-616-3789 | aakashs@usf.edu | [linkedin.com/in/aakash-shahani/](https://www.linkedin.com/in/aakash-shahani/)

EDUCATION

University of South Florida

Bachelor of Science in Computer Science

Tampa, FL

Graduated: Dec 2025

- **Relevant Coursework:** Data Structures & Algorithms, Probability & Statistics, Big Data Storage & Analysis, Database Design, Distributed Systems, Software Engineering.

EXPERIENCE

Research Assistant (Computational Systems)

CSSAI Lab, University of South Florida

Tampa, FL

Oct 2025 – Present

- Designed a real-time Human-AI collaboration framework using Python and WebSockets, reducing interaction latency to **50ms** across simulated environments.
- Optimized simulation workflows via improved state management and multi-threading, reducing execution runtime by **25%**.

AI Research Assistant (Data Analytics Focus)

University of South Florida

Tampa, FL

Aug 2024 – Apr 2025

- Analyzed multi-million record biological datasets to identify patterns linked to Alzheimer's-related protein kinases, improving downstream analytical performance by **20%**.
- Engineered automated ETL workflows for data cleaning and annotation, increasing dataset quality metrics by **30%**.

Workshop Lead (Data Science)

Data Science Club, University of South Florida

Tampa, FL

Jun 2023 – May 2024

- Led **10+** hands-on workshops covering SQL, exploratory data analysis, and Tableau, training **20+** members on real-world analytics workflows.
- Improved workshop attendance and engagement by **30%** through data-driven curriculum redesign and applied case studies.

PROJECTS

Product Funnel & Retention Analytics | SQL, Python, Tableau

2025

- Analyzed **5M+** user event logs to identify a **12%** checkout drop-off and key friction points across the conversion funnel.
- Built executive-facing Tableau dashboards tracking DAU/MAU, cohort retention, and funnel metrics to guide UX prioritization.

E-Commerce Revenue & Customer Segmentation | Python, SQL, Tableau

2025

- Processed **500K+** transaction records using RFM analysis to identify high-value cohorts driving **40%+** of total revenue.
- Developed interactive dashboards to evaluate customer lifetime value and purchasing behavior for retention strategy design.

A/B Testing & Experimentation Analysis | Python, Statistics, SQL

2024

- Designed controlled experiments with power analysis and hypothesis testing, validating feature changes with **95%** statistical confidence.
- Quantified experiment impact on conversion metrics and delivered statistically backed product recommendations.

Operational Performance Analytics | Python, SQL

2024

- Analyzed operational KPIs across **100K+** workflow records to identify process bottlenecks and SLA violations.
- Delivered data-driven optimization insights that reduced average task turnaround time by **18%**.

TECHNICAL SKILLS

Languages: Python, SQL (PostgreSQL, MySQL), R, C/C++, Java

Data & Analytics Tools: Pandas, NumPy, Tableau, Power BI, Apache Spark, Jupyter

Engineering & Platforms: AWS, Docker, Git, Linux

Core Competencies: Exploratory Data Analysis, KPI Design, Funnel & Cohort Analysis, A/B Testing, ETL Pipelines, Statistical Analysis
